

Agile Open Córdoba 2009

Córdoba, 17 y 18 de Abril de 2009

Following the success of **Ágiles 2008** (<http://www.agiles2008.org/common/pdfs/resumen.pdf>), some of the organizers, volunteers and assistant are now organizing **Agile Open Córdoba 2009**, that will follow up the Agile Software Development with a new format. This event will gather up to 100 practitioners, to discuss (mostly in Spanish) and learn techniques and experiences developing software.

Event Format (Agile Open / Open Space)

OpenSpace is a small set of rules that allow groups of people to interact in a simple, productive, organized way to create valuable dialogs that address the participants' most important issues.

Some examples

- <http://www.agileopen.net>
- <http://agileopencalifornia.com>
